

## Environmental Policy

Tidewater is committed to operating in a manner that protects our employees, our communities, our environment, and our customers. We proactively pursue incident-free operations, which includes no releases of the products we transport, store, and distribute. We embrace a management philosophy of continuous improvement in all that we do. To fulfill our commitment to the environment, we will

- *Include protection of the environment in our decision making in our operations and in our capital investments.*
- *Maintain responsible operations which meet or exceed all applicable federal, state, and local laws and regulations.*
- *Reduce waste generation and maximize reuse and recycling and give preference to environment friendly and energy efficient products.*
- *Maintain open communication with the public and stakeholders about the environmental aspects of our operations.*
- *Steward our sites and maintain plans and resources to promptly and effectively respond to an emergency event.*
- *Educate and encourage all employees to continually improve the environmental responsibility of our operations.*
- *Monitor progress towards objectives to reduce and/or eliminate environmental risks.*

We at Tidewater are proud of our heritage, and we are committed to operating in a manner which preserves the Pacific Northwest for future generations.
